

## WEEK 1

### PS309 - ONE CREDIT COURSE REGISTRATION & COURSE

#### EXEMPTION SYSTEM

#### BoilerPlate Structure

##### AIM

To create a structured repository with a clear folder hierarchy to manage and organize weekly project updates effectively.

##### OBJECTIVE

1. Organize weekly progress into dedicated folders.
2. Ensure clarity and accessibility of updates through a standardized folder structure.
3. Provide a scalable and reusable format for long-term project organization.

##### OVERVIEW

The repository will have a well-defined folder structure, with each week's work stored in a separate folder. Each folder will contain relevant code, documentation, or resources, allowing easy navigation and tracking of weekly progress.

##### SCOPE

1. **Folder Names:** Weekly folders labeled `Week_1`, `Week_2`, etc.
2. **Content:** Each folder will include a `README.md` file summarizing updates and associated files.
3. **Scalability:** The structure is flexible to accommodate additional weeks or project phases.
